DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The Prior Art does not fairly teach or suggest a sensor device having the combination of a circuit chip an adhesion film with a sensor chip mounted on the circuit chip through the adhesion film, wherein the sensor chip includes a substrate having foreside and backside surfaces, a concavity disposed on the backside surface of the substrate, & a membrane disposed on the foreside surface of the substrate so that the membrane covers the concavity, and wherein the adhesion film is disposed between the sensor chip and the circuit chip so as to form a passage for connecting between the concavity and an outside of the concavity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
